RALEIGH

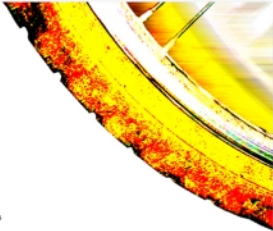

Burning a *little* rubber, can improve the environment?

Motor vehicles are the single largest source of atmospheric pollution. Each day billions of vehicles produce exhaust causing acid air pollution, cancer, lead-poisoning & a variety of bronchial & respiratory illnesses. Contained in these emissions are over one-thousand chemical pollutants, including: Tetraethyl Lead, Benzene, Carbon Monoxide, Nitrogen Dioxide & Nitrogen Dioxide, Low Level Ozone and Sulfurous Emissions.

Although, these problems can not be solved overnight, the solution has to start with us. Realistically, if the amount of people cycling were increased, the pollutants produced by the making, driving, and disposing of automobiles would drop, allowing scientists time to rethink our imperfect world. We must look towards the future and embrace the environment for ourselves and generations to come.

www.raleigh-cycles.com

So why did you buy that car?

DANGER!
Tetraethyl Lead, Benzene, Carbon Monoxide, Nitrogen Dioxide, Nitric Oxide & Nitro Dioxide, Low Level Ozone & Sulfurous Emissions!

Contributing to 20% of earth's atmospheric pollution!

ANNOYANCES!
If you've ever sat for hours on car covered streets, pretty much everybody & everything is annoying!

PRICE!
You know your pager is much! Car are endless waste when it comes to insurance and costly gas prices. They can't get enough of that stuff!

STRESS!
Driving causes anxiety in tense situations. This leads to pricey traffic tickets and high insurance rates. Don't forget your stereo!

So why did you buy that bicycle?

b i k i n i v i l l a g e

A stylized line drawing of a woman in a red bikini, integrated into the text 'bikini village'. The woman is depicted in a dynamic, walking or dancing pose, with her right arm raised and her left leg forward. Her body is rendered in light gray outlines, while her bikini top and bottom are filled with a solid red color. The text 'bikini village' is written in a bold, black, serif font, with the woman's figure overlapping the letters 'i', 'n', 'i', 'v', 'i', 'l', 'l', 'a', 'g', 'e'.
